

HUME COAL PROJECT
EIS SSD 15-7172

Withhold from Dept
Website.

June 14th 2017.

Someone famous once said, "quote" All it needs for evil to succeed, is for good men to do nothing.

So now I'm putting my objections to protest most strongly against the Hume Coal Project!!

Coal mining should be on the wane / not increasing. It's a bit like asbestos and cigarettes — the power that be are in denial until the community takes up the fight; we now know the damage coal mining does to the environment & our health.

I believe Posco has a bad reputation overseas for environmental destruction in their search for coal. To consider re-injecting mine waste back into a mine is ludicrous — the damage to the aquifers from mining searches is already disastrous.

Let's take care of our country and leave a legacy for future generations that we can be proud of — not ashamed.

Yours most Sincerely,
