This is a submission to the Hume Coal Project EIS. SSD7172

I object to this project and recommend that it be rejected.

I have grave concerns regarding our water table for example 93 bores to be drawn down - from Hume coal's EIS.

We are one of the driest countries on earth water is paramount for survival

the number of coal trains with dust plus the dust from the mine itself will create serious health problems for people with breathing problems e.g. asthma

Sutton Forest, Berrima, Buttradio, Moss Vale, Berroral and Robertson

this project does not make economic sense because of the risk to ~~sustainable~~ sustainable jobs in agriculture + tourism

I ask the Government to reject this project

Signed,

no political donations given
