Re: Hume Coal Project EIS SSD 15_7172

I do not want a coal mine in the Southern Highlands. This is one of Australia's natural unspoilt areas. Any threat to the health and supply of water in our very dry country is unthinkable. The future of our land for generations to come is our responsibility to preserve not destroy.

The actual threat of this mining venture has been extremely detrimental to the health and well being of many people during the seven year protest. Protecting the land, the water and our people should be a priority. Consideration for a healthy area for people to produce food unpolluted is paramount. Please help stop this mine.
