This is a submission to the Hume Coal Project EIS. SSD7172

I object to this project and recommend that it be rejected.

I have a bore on my property at 61 Old Mandemur Road.
I have lived here for 6 years and I bought the land
Because it had a bore already in place, and before I
built my house.

My bore collects water at about 60 metres, then goes
through two collection tanks and a filtration system to
remove most of the iron and manganese. On testing the
bore water is suitable for crop growth and animal drinking.
That is ideal for me!

What do I do when my bore runs dry!

Thousands of dollars of trees, bushes, plants are at risk.

My wife is a very keen gardener.

We were here first. Who will replace my lost bore water
Who will recompense me for the flora which will die in
droughts.

I ask the Government to reject this project

Signed,

JR Humphreys
