Attn Executive Director  
Resource Assessments Dept  
of Planning & Environment

Dear Sir

Submission to Hume Coal Project SSD 7172

I object to this project on the following grounds :

1 I have lived at Exeter on and off for 68 years & permanently since 1985.

If this project is allowed to go ahead I fear that the district will change dramatically:

A the dust from the coal storage will alter the quality of the magnificent air here

B the bores which now are used for agriculture, horticulture, food production , & wine will have reduced water & may result in the properties being sold or divided up thereby changing the nature of the landscape for the worse

C with the changes described above tourism will be affected

D this short term project of 19 years of operation will have ruined the area with no lasting benefit

2 The rail link will create a great deal more noise for places like Roberson

I ask the government to reject this project

Yours faithfully

Margaret Hibbert
