Attn: Executive Director,
Resource Assessments Department of Planning and Environment
GPO Box 39
Sydney NSW 2001

This is a submission to the Hume Coal Project EIS.SSD7172

I object to this project and recommend that it be rejected because:-

1. I do not want this project to interfere with the clean water in this growth area for many age groups, particularly the many families living here in the Southern Highlands. We do not need to be disturbing the good water table that exists today.
2. I believe we do not need coal as an energy source its real cost is too expensive for this generation and future generations
3. We should be looking to other energy sources which are less expensive
4. We should not be mining the ground where good agricultural practices are conducted
5. We do not need to pollute the area, we need to be reducing pollution in Australia.

I ask the Government to reject this project.

Signed:

Suzanne Ward
