Location: Lot 2 DP1108702 Barleigh Ranch Way Eagleton NSW 2324.

I strongly object to the following development application for the following reasons.

- As an employee of Eagleton Ridge Respite Centre for 9 years I have concerns regarding the clients that access our service. Many of our clients have sensitivities to different types of noise, if a noise is constant and they can't understand what it is it can become an irritation, thus setting in motion erratic and challenging behaviours. Having a quarry operating in such close proximity to the centre could have devastating impacts to everyone who accesses our centre & the disabled residents who are living here.
- Night time noise to the surrounding residents of Eagleton from the trucks & machinery at night time
- Environmental impacts on the local wildlife
- Risk of contamination to Grahamstown dam
- Increased traffic around the area, It is already difficult to merge in and out of the Pacific Highway
- Vibrations causing damage to homes in surrounding areas & also disrupting residents who live at Eagleton Ridge Respite Centre.
- The risk of unemployment for my self if Eagleton Ridge Respite Centre has to downgrade its service, move its clients, change its location, or in the worst scenario, close down.

Thank you for taking the time to read my objections.
