Location: Lot 2DP1108702 Barleigh Ranch Way Eagleton

Applicant: Eagleton Rock Syndicate Pty Ltd.

I object to the above DA for the following reasons: the noise the quarry will produce, the vibrations from the quarry and also the dust/polution it will create.

I believe the noise being produced from the proposed quarry will effect not only the clients who live at 100 six mile rd, the staff who care for these clients and the clients who come for day programs but also future clients wanting to use our facilities as a program. The noise will detur future clients and their carers. My job being the general maintainance and casual support worker I work with both the clients and outside with all of our animals. The noise that would occur as of the quarry will effect our animals, such as our horses. Theses horses are there to act as company and an activity to our clients. If our horses are effected by the loud noises and vibrations from equipment, they would become distressed and unpredictable therfore making it a hazard for our clients. The vibrations from the equipment will cause effects to the clients and their disabilities, the staff and how they go about their day to day care for these clients but also the structure that these clients live in. the glass windows will break with extensive vibration and noise, therfore causing the company expenses that wouldn't be needed otherwise. The dust created from the moving trucks and crushing with the equipment will cause polution in the air making it harder for our clients to breathe.

I strongly object to the proposed quarry and to the approval of the DA, for all the reasons stated in the above paragraphs.

Kind regards.

Eric Furlonger, maintainance/casual support worker.
