Parramatta light Rail Stage 1-
Westmead to Carlingford via
Parramatta CBD and Camellia
Application Number SS1 17-8285

I would support the proposal provided I am able to obtain access to the light rail platform.

The Environment Impact Statement makes no reference of disabled access from the Oatlands area to the Dundas light rail platform.

I would like to see an overpass with lifts constructed across Kissing Point Road for disabled access to the light rail platform at either of the below mentioned points
(a) An overpass with lift positioned near the bus stop on the Fred Robertson Reserve of Kissing Point Road with the overpass to align with the light rail platform. This overpass to follow the present right of Way between the properties which leads to the present railway line and station.

(b) That and overpass and lift be constructed in conjunction with the new bridge being built for the light rail crossing over Kissing Point Road. The lift to be constructed on the Oatlands side of Kissing Point Road with a walkway to the light rail platform.

By providing this form of access it would be wheelchair and walker friendly to all who live in the nearby Oatlands area. I have never made a political donation.

Jennifer Gaffney.
