**Martins Creek Quarry Project SSD 14\_6612 - Letter of Support**

We at SOS Excavations support the Martins Creek Quarry.

We have worked with DARACON for several years, providing excavation services. Because of this, we understand that the Martins Creek Quarry creates substantial economic growth for the local region, and provides several workers and their families with employment as a result.

The quarry not only benefits our organisation, but also those around us. Many local organisations rely upon the continuance of the quarry to grow business and maintain the employee base that currently exists. Without the continuation of supply of materials from the Martins Creek Quarry many local businesses will be impacted negatively.

SOS Excavations supports the Martins Creek Quarry.

Kind regards,

Shaun Breen  
Director  
SOS Excavations
