Martins Creek Quarry Project SSD 14_6612 - Letter of Support

MP Schultz Excavations has been a provider of plant and equipment hire to DARACON for several years, mainly for road construction projects.

We support the continuation of the Martins Creek Quarry, and extend this support to the current employers and workers at the quarry. The project provides much employment for the local area, and provides income for many workers and their families.

Along with this, the quarry provides a great deal of economic benefits to the region. The flow-on economic effect that the quarry generates is a fantastic income booster for several local businesses and organisations.

MP Schultz Excavations supports the Martins Creek Quarry Project.

Kind Regards,

Mark Schultz
