Martins Creek Quarry Project SSD 14_6612 - Letter of Support

We support the Martins Creek Quarry Project. The project provides local businesses with turnover, and allows those businesses to be able to hire local workers. It is for these reasons that we will continue to support the project.

Not only does the quarry provide employment and work for several people and families, it also provides much economic prosperity to the region. This includes the local businesses that rely directly on the product garnered from the quarry, as well as other local companies that provide equipment to the quarry, and the companies that transport the product across the region.

I would once again like to reiterate my support for the continuation of the Martins Creek Quarry Project.

We have not made a reportable political donation.

Regards,

Paul Wilde
Managing Director
