Martins Creek Quarry Project SSD 14_6612 - Letter of Support

P & M Galea provide plant hire services to DARACON, enabling them to work on key rail and Roads and Maritimes Services projects. These projects are carried out through Sydney and surrounds. It is via this connection with DARACON that we understand the importance of the Martins Creek Quarry Project, and wholeheartedly support it. Product from the quarry is used for RMS road works and local council works throughout the Hunter region.

P & M Galea also understand that the quarry provides employment opportunities for local communities, in turn providing an economic boost for these communities.

It is because of these factors that P & M Galea wish to reinforce their support for the Martins Creek Quarry Project.

Kind Regards,

Mary Galea
