

---

To whom it may concern,

Australian Civil and Environmental Services Pty Ltd would like to formally pledge its support for the Martins Creek Quarry Project.

Our company has decided to support this project as it is an integral part of many of the jobs we undertake and we believe there would be a number of negative effects if the support of this project does not continue.

The success of the quarry helps maintain jobs for many people within the community and limiting material supply will increase the cost and availability of materials within the area, thus causing a negative effect on business and the community.

Our company relies on the quarry for the providence of materials which we would not be able to do works without out, which would then cause a flow on effect having negative impacts on the local business and employees. This project doesn't just effect our business but all of the local community and tax payers.

Please don't hesitate to contact us should you need any further clarification on our support for the Martins Creek Quarry Project.

Kind Regards,

Joshua Brown

Operations Manager.
