

Please note the following example of a Tocal Rd  
Bolwarra Heights dangerous situation....

This section of road is narrow and  
congested, it is NOT suitable for any  
extra **heavy traffic** that is **incapable**  
**of stopping in an emergency**  
**situation**

A few of our local residents met at 3:00pm on Sunday 29/6/14 to discuss the road and truck issues. As we were getting ready for a photo, a van pulled up in front of where we stood and dropped off several passengers..... see next page.

The van parked for a short time on Tocal Rd near the petrol station and several passengers alighted.

This is a prime example of one continual problem that WILL cause a serious accident on Tocal Rd in the future if road improvements are not instigated URGENTLY.

In the short time that the van stopped, four cars crossed the centre line and went around it. Luckily the road was clear in the opposite lane. Note the car that had parked on the opposite side of the road up on the grass area near the roadway gutter.
