Re:Development Application by Buttai Gravel Martins Creek Quarry

There are a number of reasons that I object to the development application put forward by Buttai Gravel and because I am not personally effected by the quarry operation other than the number of trucks running through our village that I treasure and visit once and sometimes twice a day.

When Buttai Gravel bought the lease to operate the quarry everyone involved new that one of the conditions of operate was that 70% of the product was to be transported out by rail.

This condition and others have been totally ignored by the operator causing so many people in the district untold hardship and .....beyond .....

I personally resent the attitude of the owner of Buttai Gravel in putting forward the proposed DA for further development of the quarry and the statement made by Mr. Mingay at a meeting I attended that if you don't like it move out.

I can only repeat I totally object to the DA being put forward and request the Department to reject this DA and hold the Company to the current limit that they bought the lease and the condition that 70% of the product will be transported by rail.

Yours faithfully

Robert C. Betts
