Martins Creek Quarry Project SSD 14_6612 - Letter of Support

I write to confirm my support for the Martins Creek Quarry Project. We are involved with the construction industry and are aware of the importance ensuring quality materials are available at a competitive price – Martins Creek Quarry has been producing quality hard rock materials and product for 100 years.

Being a haulage business, my company will be directly affected by the expansion project. The Hunter Valley has and still is facing a severe decline within the mining industry and having significant job losses as a result. If this project doesn't get approved it's just another loss to the local area.

The Environmental Impact Statement addresses key issues, especially those raised by community. As a haulage company we follow the Martins Creek Code of Conduct that Daracon has implemented to respect the local community.

My family and business support the Martins Creek project.

Regards

Leon Jenner
