Attention Planning Services

I am writing in support of the Martins Creek Quarry Expansion Project (SSD 6612) as proposed by Daracon Group.

The Martins Creek Quarry is a crucial source of the rock required for stemming. It is great the aggregate is available from a local long time operating quarry.

I work for Daracon as a Stemming Truck Operator. Daracon have a large fleet of Stemming Trucks that require specially qualified drivers to deliver the stemming aggregate from their Martins Creek Quarry to the Mt Thorley mine.

I believe the Martins Creek Quarry is a valuable resource to the Hunter area, not only as a supplier of quarry rock, but also as a substantial employer of local people and is of great importance to the regions economics and sustainable future. For these reasons I strongly support the Martins Creek Quarry Project.

I have not made any reportable political donations.

Regards,

Guy Holman
