Major Projects Assessment

GPO. Box 39

SYDNEY, NSW, 2001.

NORTH CONNEX APPLICATION NUMBER SS1-13-6136.

Please find below our submission  
in response to the exhibition of the ES  
for North Connex

Firstly we would like to state we object  
to the PROJECT as described in the ES.

We have high level of concern regarding  
the following issues and request that these  
be considered by NORTH CONNEX and  
the Department of Planning and  
Environment. in regards to the  
NORTH CONNEX tunnel, We are  
concerned about:

2.  
1. Placement of the Northern ventilation stack in the CENTRE OF A DENSELY POPULATED residential area in Wabesonga, where 9300 school children will be exposed, as well as multiple aged care facilities, hospitals, businesses and homes.

2. We are highly concerned about the multiple large scale research studies that suggests the impact of air pollutants on health are serious. These include increased death from heart disease, increased risks of lung cancer, stroke, poor lung growth in children, increased asthma, and recent research suggesting low birth weight for pregnant women, increased autism and congenital heart defects. These studies confirm air pollutants has prothrombotic and inflammatory effects on humans which cause the above health problems.

To address our concerns we request that the following actions are undertaken

- 1 Due to significant health concerns of the current project design, we request the Department of Planning does NOT APPROVE THE PROJECT in its current form
- 2 We also request that the alternate transport options to ease congestion on Pennant Hills Road be considered such as an orbital surface route
