Dear Director

This advice is one of many that could be directed to you to seek or remediation of a poor decision relating to a procedural planning matter in the North Connex project.

I refer to the siting of Thornleigh Trelawney Avenue support facility in the residential are for which it is planned.

Common sense, let alone engineering expediency would suggest that this be located adjacent to a commercial or industrial area, where nocturnal activity would be more acceptable.

To contemplate the noise and disturbance at night in this residential side of Pennant Hills Road really does suggest that your staff have not thought out this matter clearly.

I write in a professional capacity to request that this facility be placed on the opposite western) side of the main road where it will not generate years of misery for the local residents.

Please give this simple matter your active remedial consideration.

Sincerely

Ian R Stubbin
