Subject: St Aloysius College Redevelopment Master Plan Application SSD 8669
Importance: Normal

Dear Mayor and Councillors ,

My wife and I support St Aloysius College in its Education mission and its desire to improve and redevelop its Campuses to improve its performance.

I attended the Milson's Point Precinct meeting of 3 May 2018 where these proposals were discussed and we have read and support the Objections to be submitted to this application by the Precinct.

In particular we object to the fact that the application is of a General Nature relating to the Envelope of the proposals which will be done over a prolonged period of at least 10 years. Once approved there is no provision for Objections to the plans .

the Junior School proposals are for the distant future and many details of the Excavation as to the Extent , Noise , Trees ,Solar and Neighbours disturbance as well as removal of the excavated debris are of concern.

Lack of Parking Provision in the Main School Campus despite the opportunity with rebuilding of the Eastern Wing together implications of the new extended Roof Top Area as to noise , lighting ,visual obstruction and use both during and out of school hours need consideration.

Yours Sincerely
(Dr) John Saalfeld
7/80 Upper Pitt St. Kirribilli .
