

Name: *MRS SUSANNA GORE*

Address: *280 CANBERRA AVE; CASULA 2170*

PCU080017

SSD-5066-Mod-2 and SSD-7709-Mod1

I **OBJECT** to the above application for the following reasons:

I OBJECT to the application for Dangerous Goods Storage.

The proposed modification area is surrounded by highly a populated residential, commercial, educational, cultural and recreational parkland areas, this includes all the residents from Casula, Moorebank and Wattle Grove comprising from low density homes to high rise towers, childcare centres, schools, the Casula Parkland playgrounds, the Casula Powerhouse, the NSW Barefoot Water Ski Club on the Georges River and many more local business.

This creates a huge risk to the wellbeing and safety of residents within the above mentioned vicinities, was there to be a mishandling that could lead to an explosion, a fire with toxic smoke/fumes or a leak into to the Georges ecosystem.

My living area and bedrooms are all easterly facing with large glass windows. I will be directly impacted if any of the above was to occur. I will not have peace of mind and will live in fear of such events.

I OBJECT to the application for Height Increase:

This will block the current horizon view not just for myself but for a large portion of residents. There are a large number of homes that will have their main living area facing large warehouse walls by day and affected by the light pollution by night. This will directly impact the quality of living and the value of property.

The Viewpoints for Casula Road and Canberra Ave. are not a true representation on how we are directly affected. Please see the attached pictures from my living area and bedrooms.

I OBJECT to the application for noise increase.

The increase of noise levels will directly impact quality of life for many residents and myself. The lower vegetation on the Georges river does not provide a buffer zone as the sound travels up to where the majority of dwellings are built along Casula Rd and Canberra avenue.

Already we are impacted by the noise generated by nightworks at the site and an increase of noise levels will cause stress, sleep disturbance and possible psychological problems.

I declare that I have not made any reportable political donations in the previous 2 years.
