Address:

Weston, NSW
2326

Content:

This kind of facility and the possible health and environmental hazards it may pose, has no place so close to a residential area. A facility that burns dangerous goods will also have an impact on local housing prices in a negative way. Who would buy a house so close to such a site? No-one. The few jobs it brings to the area are an insignificant compensation considering the negatives it will result in.
