

Objection to the Pindimar Abalone Farm Project, 10\_0006

Shay Hands  
84 Castleburgh St  
Smythville 2330

Dear Mr Hazzard

We wish to object to the Pindimar Abalone Farm Project because we are worried about pollution of the port. The project submission states that the farm will put ONLY(!) 1,000 kilograms of nitrogen into the port a year and that that amount is insignificant because the port is already so polluted. We wish to preserve the waters of the port to be as clean as possible not only for the residents but for the very important tourism industry. Surely it is important to protect this beautiful and valuable resource for future generations.
