Bobs Farm Sand Mine Project (SSD 6395)

To Whom It May Concern,

Dear Sir or Madame,

This is our submission made by way of objection to the "Bobs Farm Sand Mine Project."

We have a farming property on The Morab Rd, Bobs Farm and we are concerned about the underground water which we currently use to water crops in the summer. As we have to have a water license to use this water which we pay annually and also for the water we use.

I have lived here all my life on this property. With the mine going to go down 15 mtrs it is leaving it open for the salt water to come in as you have Jillegary Creek on one side the ocean on the other which will allow for salt to come in, and the leaving the 24.8 hectare artificial lake which could lead to flooding properties if we get a lot of rain. Also we don't think it is fair the trucks that will be going behind Bobs Farm School and the houses in that area.
