I am against this proposal on the following grounds:-

The amount of around 200 truck movements to & from 90 Gindurra Road would have a very big impact not only on Gindurra Road but also the highway from the M1 turnoff at Kariong to The Avenue Somersby which becomes a bottleneck in the morning & afternoons.

The spread of silica dust will cause harm to local communities & the environment generally. There will be no way to stop the dust from becoming airborne. This will affect Riding for the Disabled, Sports College plus the Juvenile Justice Centre at Mount Penang.

Also the vibration from trucks & also the concrete crusher will be detrimental.

The open pits for storage of materials will allow the wind to circulate the industrial waste over a wide area.

I am of the belief that asbestos has already been located at 90 Gindurra Road Somersby.

I have not made any reportable political donation in the past two years.
