I am very much against this Development Somersby was to be a Clean Industrial Area

My concerns with this application are as follow:-

The effect that the process of crushing materials will have on the organic farmers based around the Somersby area. The dust will definitely counteract the benefits of organic crops meaning they will no longer be organic!

Another concern is the high rate of water consumption which would be required to water down the waste to prevent it being spread around the surrounding areas. This area already has significant water shortages & by constantly spraying building & other materials it will only increase the problem & I doubt do much to keep the dust from becoming airborne with a wind let alone a strong wind. Where will the water come from? Obviously it will not be recycled water & it will be a single use only therefore creating high water consumption.

The M1 already has a very high volume of truck traffic & in a small street like Gindurra Road there is a strong possibility of accidents happening.

I have not made any reportable donation to any political party in the past 2 years
