

Director Industry Assessments

To Whom it may concern

PCU080150

I support the Recycling Plant application NO 350-866
90 Ginderra Rd Somersby.

We need more Australian family owned industry in
this country.

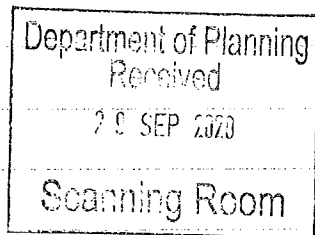

If this group live up to their promises it will be
a great asset to the community & Central Coast

What is needed is recycling of Building waste as
opposed to mining sandstone & destroying the local
ecology.

I have visited the site and was impressed with the plans
and the vision of a wildlife Habitat barrier at the back

The interest in local suggestions in using native plants
to form a barrier (Visual) was impressive also. They were
open to alternative suggestion eg Gyneria lilies to avoid
fire hazard build up of tree branches leaves etc

Yours Sincerely

Re application NO SSD-8660 90 Jindurra Rd Somerset.
Please Do Not Publish Personal Information as there
has been a fair Hate Campaign against my family to opponents
of this Project
