I do not support this development proposal on the grounds of water usage. On a very hot day water vapour will dry out very rapidly even with sprinkler system & in a matter of minutes. Also this area already has significant water shortages & by constantly spraying building & other materials it will only increase the problem & I doubt do much to keep the dust from becoming airborne with a wind let alone a strong wind. Where will the water come from obviously it will not be recycled water & it will be a single use only therefore creating high water consumption

Dust is a very serious health problem & although I don't live near the site I certainly often travel in the area. To realise the serious concerns about dust one only has only to look at the Hunter Valley & the high respiratory problems there.

Also as Somersby & Kariong are the gateway to the Central Coast it makes the 2036 NSW State Government Vision a joke.
