

TO: NSW Department of Planning

Submission on Newcastle Inner City Bypass Rankin Park to Jesmond

Date: 11/12/16

Name: DR MICHAEL SCARON

I consent / do not consent to my name being published on the list of people who have made a submission.

Address: 210 St James Rd
New Lambton 2305

I object to the project as exhibited in the EIS.

The design of the Northern intersection significantly downgrades access from Jesmond Park to the Silver Ridge and Brickworks Park area by requiring path users to cross three sets of traffic lights. This will be slow and inconvenient for people using the path to commute to work. As one of the crossings is in the middle of an expressway on-ramp linking roads with speed limits of 70 and 90 Km per hour, it will be particularly dangerous if people cross without waiting for the lights.

A grade separated connection in the form of a flyover or underpass, allowing walkers and cyclists to continue along the south side of Newcastle Road is the only acceptable solution.

The new crossing of Newcastle Road (bridge 7) will create a useful connection to the University and Jesmond shops and should be included in the project.

Lives have already been lost at road crossings in Jesmond & Lambton North.

Please consider future generations when projects such as this are planned.

It needs to be safe, to encourage people out of their cars & to start walking & cycling.

since
Michael
