

Submission supporting Wollar Solar farm SSD 9254

I am extremely pleased to support the Wollar Solar Farm as being a very positive development for the environment. The farm have none of the negative social and environmental impacts produced by the nearby Wilpinjong open cut coal mine and will create clean jobs and attract new families to the Wollar district. In addition it will generate enough clean energy for about 104,926 average NSW homes and displace approximately 515,564 metric tonnes of CO<sub>2</sub>. Great for the region and great for our commitment to alleviating the effects of climate change.
