

PCU038463

October 1st, 2012

The Hon. Brad Hazzard,
Minister for Infrastructure & Planning NSW,
Level 31, Governor Macquarie Tower,
1 Farrer Place,
Sydney N.S.W 2000,
Dear Minister Hazzard,

Enclosed are lists of signatories who signed submissions against the third freight track, Epping to Thornleigh. Original submissions have been delivered to Minister Berejiklian.

The residents, along with other citizens who have a link to Beecroft & Cheltenham are appalled at the third track proposal and what it means for our community.

The E.I.S is both deficient and dismissive resulting in poor conclusions when considering the effect on residents. In fact it exposes even more devastation on what was our way of life and why we chose to live here.

The time line for construction is a minimum of 4 years , probably much longer using past projects as a guide, yet little consideration has been given to residents and businesses within the area.

Rail infrastructure guidelines appear not to follow the same best practice required of companies involved in private infrastructure projects.

We wonder how this government without much thought could agree to this freight line without considering the implications for each and every householder and business in this area.

The health implications both during **the construction period** and **the operational period** appear not to have been considered. Sleep deprivation, excessive noise from unregulated **OLD** diesels, harmful emissions, air quality, the imposition of construction compounds close to homes, visual amenity, traffic chaos to name a few.

As the E.I.S only came out on Sept 14, **it is disturbing to find that tenders closed July 30**. This would indicate that the significance of the E.I.S in the process is zilch. How can this process be justified when the project has been pre determined?

No attempt has been made previously to alleviate the noise problems we have suffered for years, so any increase in freight movements is only going to exacerbate the problem.

We strongly urge you and the State Liberal government to reject this proposal and to redirect the substantial contribution of \$214,000,000 plus to more worthy projects.

Yours sincerely,

Gail Simpson

Submission on Proposed Epping to Thornleigh Third Track Northern Sydney Freight Corridor

The Hon. Gladys Berejiklian, MP
Office of the Minister for Transport N.S.W
Level 35, Governor Macquarie Tower
1 Farrer Place Sydney N.S.W 2000

Project: Northern Sydney freight corridor / 3rd freight line

As resident/s affected by the proposed third freight line, I/we wish to submit our objection to the flawed planning process and imminent construction of the third freight line based on the following considerations:

- Lack of representation by government representatives to protect and serve our community interests.
- Predetermination: that the project will commence in 2013 reveals the approval process is by 'work back'.
- Increased noise and pollution from outdated diesel engines 24 hours a day through **established prime residential areas**. Noise levels already significantly in excess of N.S.W(85dB) and World Health Organization (55dB) safe levels. Health, lifestyle and community issues ensue.
- Particulate matter emissions from non-road diesels are a known causative agent for respiratory problems and asthma in children. U.S.A EPA420-F-04-029 report. Air pollution from carcinogenic coal dust and mining chemical hauled past homes, schools, churches, parks and Village centre.
- Excessive wheel squeal due to steep gradient and bends between Cheltenham and Beecroft.
- The likelihood that the Village Green, our only central community park for activities could be used as a construction depot, resulting in lasting urban degradation.
- Removal of established trees and vegetation along rail corridor.
- Loss of property values. Confirmation that there will be no compensation to home owners for the drop of around 20% in property values which will flow from the project.
- Loss of our Village atmosphere, Scout Hall and popular children's playground.
- Businesses at Beecroft Village will suffer due to loss of trade caused by construction, traffic congestion and lack of parking. Some may close.
- Major disruption to our community over the 3 or more years proposed construction phase.
- Controls apply to diesel trucks but are not enforceable on old rail freight engines which will use this line, thus resulting in operators not willing to upgrade.
- Coal trains from the Hunter Valley using Port Kembla loading facilities are not subject to noise accommodation licences which apply to State run trains. Unlicensed private operators escape regulations while operating on a government owned network.
- Claimed cost benefit analysis unlikely to be correct due to expensive retro fitting and alteration. Quadruplication of the line between Strathfield and Epping would be of more benefit.
- Misdirected use of \$200,000,000 of taxpayer's funds.

NAME (please print): SIGNATURE:

ADDRESS:

PHONE: EMAIL: DATE:

PLEASE RETURN SIGNED SUBMISSION FORM to No Third Track Action Group
or mail to the Minister Berejiklian at the above address. Thank you for your support.

COLLECTION BOXES: Beecroft Pharmacy or Ray White Real Estate.

Enjoy having a relaxing coffee at Beecroft Village?

Then consider this...

ARE YOU AWARE a major dedicated freight train line is being created between Epping & Thornleigh with up to 40 freight trains per day to operate **day and night?**

Information from the appropriate government agencies and departments is scarce. Refer www.transport.nsw.gov.au/projects.

No mention of the negative impact to our suburbs

There is NO Government regulation to control noise levels on old diesel engines which are used almost exclusively on this track!

- **There will be more wheel squeal, engine noise and pollution 24 hours a day affecting:** restaurants and coffee shops • schools • shops • businesses • recreational parks
- Loss of the wonderful children's playground at Beecroft station
- Likely removal of the Scout Hall in The Crescent
- Removal of the trees along the rail corridor particularly Cheltenham
- Construction expected to take 4 years starting 2013 until 2016 with constant traffic chaos for Beecroft and Pennant Hills
- Road and pedestrian bridges will need to be reconfigured - more chaos
- Loss of trade for local businesses due to parking restriction during construction
- Cheltenham Station to be demolished and a new station built
- Major car park to be constructed at Cheltenham Station which will feed traffic onto currently quiet residential streets
- Property prices will be diminished and our Village will never be the same

SIGN A SUBMISSION TODAY (see overleaf)

There are alternatives to the 3rd track. Let Parliamentarians know of your concern and urge consideration of all alternatives and consultation.
