

Epping to Thornleigh Third Track Proposal

Application No. SS15132

I object to the ETTTP and believe the EIS is inadequate and doesn't address the full impact on the community. I ask for the proposal to be reconsidered particularly with regard to the following points.

1. Not enough action is proposed to reduce the noise impact.
2. An increase in diesel locomotive movements will increase pollution of diesel particulate matter. No controls are proposed to regulate this.
3. Insufficient action is planned to reduce the impact on the Beecroft Cheltenham Heritage Conservation Area.
4. No arborist's report has been taken into account for tree removal / replacement.
5. Beecroft and Cheltenham railway station impact is unacceptable and ill-conceived.
6. Such major proposal for the rail system has failed to provide sufficient car parking spaces to allow for increased use of public transport.

Please note, I am not against the freight rail system improvement. I object to the improvement being done in a quick, cheap and ill-conceived way.

Yours sincerely,

Sandra Burleigh
