Dear Sir,

Re: Epping to Thornleigh third Tract project.
SS1 5132

I completely oppose the above project, as outlined by the Cheltenham Civic Trust, which I will not repeat here. I have previously expressed my view on this innane proposal.

I live only 100 metres from Cheltenham railway station. Having lived here for 50 years I am concerned about the potential for health problems due to pollution, noise and increasing congestion. physical and mental health problems are being built into our great city. It has become a 'grossly obese individual' bursting at its seams. We are forced to live in boxes with poor amenities.

To convey goods through a grossly congested city centre is a long term poor decision. A second crossing across the Hawkesbury River to penrith (area of high unemployment) has long been seen as the best decision by costly. I believe the above proposal long term is a poor financial investment.

What would the late Dr. John Bradfield have recommended? Surely not the current proposal (SS1 5132).

The politicians don't seem to listen to the citizens who voted for them. They do so at their peril!

with respect,
please listen.

Andy Bennett
