Dear Sirs,

**RE: Objection to 'Karuah South Quarry' – SSD 17-8795**

I am writing to lodge my objection to the above 'proposed gravel quarry', because:- it is an unnecessary and inappropriate site and the local habitat and wildlife is far more precious and valuable to the community than an inappropriate unwanted (by the community) quarry development on prime pristine land.

Full grown trees, especially very old trees are far more valuable in many ways than a dusty quarry which will pollute and destroy our pristine air and water. Trees give us oxygen and provide shelter for wildlife, birds and insects. Please do not allow this to proceed.

Yours faithfully,

**Di Morrissey**
