Dear Sir,

Re: Submission Marine Finfish Cage Trials (SS15118)
We totally support the proposal.

The EIS clearly sets out the principle objectives and rationale of the project which is broad-reaching and dynamic.

Clearly the project will have no detrimental effect on the environment.

A suggestion might be to consider a small information board and or display near the Hawks Nest surf club car park... with the cages being just visible from that point the many visitors to the area would then understand the project.

A further suggestion might be to establish a small local community to report on any adverse effect the project has on local environmental, social or other issues.

Again we support the project.
