Subject: Sell and Parker proposal to increase capacity of Tattersall Road facility

Dear Judy
I am aware that responses were due by 22 October 2020, however, if possible include the following in BCCs submission.
I have received representations from 5 constituents opposing the proposed increase in production at the Sell and Parker Metal Processing and Recycling facility. Issues are:
1. The general and most consistent opposition issue is the existing noise and concerns regarding the increased noise.
2. The amenity of the area
3. Environmental issues.
4 Traffic issues.
Given this facility is within and near housing communities I also have concerns consistent with the community on this significant expansion within the LGA and the increase in trucks to facilitate the expansion.
Regards Kevin
