Dear Sanjay,

Thank you for contacting me regarding this issue.

I will include your concerns in my submission to Council Officers to include in the Blacktown City Council submission to the DPIE.

Regards, Kevin

Subject: Regarding: Kings Park Metal recovery and recycling facility expansion

Dear Kevin,

I am Sanjay Cholia and our family live at [REDACTED] Turner Street Blacktown NSW 2148

As Councillors for Ward 2 I would like to bring to your kind attention regarding large heavy grinding/crushing noise of metal from abovementioned facility where we have reported our concerns to relevant EPA authority accordingly (noise issue is ongoing) comments have now been submitted to DPIE today

Now, metal recycling facility increasing their scrap metal capacity from 350,000 tonnes to 650,000 tonnes a year operating times from 0600am- 0900pm Mon-Sat and we believes this noise would be a constant source of inconvenience to the residents, convalescent patients, senior citizens, students etc. As the authorities must be aware that the location in question constitutes the old city and is thus thickly populated hence the discomfort level of the noise becomes all the more troublesome.

We as residents believe that if proper measures to reduce the noise permanently are adopted, the residents do not principally have any objection before any approval granted by the authority

Therefore, I would like to request to you and your authority to thoroughly examine this proposal and make a submission to the NSW Government accordingly

Thanking you in advance
