Re:cleanaway western Sydney energy & resource recovery incinerator  
Project 25896

I strongly object to having an incinerator built at Eastern Creek just a few km from the Minchinbury residential population

Am very concerned about the huge health risks posed by this monstrosity

Toxins from the incinerator are found in milk, eggs, meat, drinking water, THE AIR WE BREATHE

The incinerator poses as a significant threat to public health

The effect of environment exposure on human health has massive detrimental effects

Previously an application for incinerator was denied due to the huge health risks

Why is the govt not caring about western Sydney residents.

Proposed incinerator will affect all of Sydney depending which way the wind blows

I object.

I do not want to inhale pollutants to harm my health

What about the children & there is a school very near the proposed site.

They are our future generation...do u want to poison them & damage their health

Children are more vulnerable to harmful effects of toxin

studies show housing prices in the immediate vicinity of an incinerator fall typically by 20% because people are reluctant to purchase in the toxic fall out zone around the incinerator

I object to this proposal
