33 Malinya Crs
Moorebank NSW 2170

LOT 6 DP 1065574 NEWBRIDGE ROAD, MOOREBANK

OBJECTION

The added dust and added heavy vehicle traffic from granting of the said facility would be detrimental to health and lifestyle to Moorebank residents.

Please be advised that our Family are opposed to existing and/or future construction and/or operation of any materials recycling facility on a site off Newbridge Rd., Moorebank – on or beside the Georges River.

Originally there was a larger buffer of native trees and open land downwind of the site. Over the last ten years or so planning permission has been granted for Georges Fair housing development and for hundreds of families to make Moorebank their home. These people have built their dream homes and will be wondering why they and their children are suffering asthma and other ailments.

Our outdoor entertaining areas, and within our home I'm repeatedly cleaning away a layer of grey dust. The existing dust I believe is responsible for my continuing battle with infected sinus and breathing troubles. Any further materials recycling can only make matters worse.

Hans and Wendy Zecevic
