Content:

To whom it may concern,

I strongly oppose the application for a recycling plant in Moorebank.

The idea of having a plant so close to residential properties is ridiculous. The visual and air quality for the area will be greatly decreased, you just have to visit the plant currently operating at Chipping Norton to see the dust that is created. As for the water vapor reducing the dust please observe the waste management centre at Eastern Creek and observe how effective they work!

The traffic report is also outdated as it has no data in regards to Bushmakers Drive being open, at present there is already heavy traffic at peak times.

The application also keeps referring to Georges Fair to the Boral site, this I believe is to mask the fact that the Boral site is now a residential estate of approximately 1000 homes. Also Benedict are in the process of closing down there plant and are presently decreasing volumes and have a DA to build a marina so comparing them is also misleading. Benedict also have direct access to Newbridge Rd unlike the recycling plant.

Page 7 of the proposal also states that 'other recycling uses which may be established on the site at some point' what exactly are these and why not state them in the application?

The original public consultation was flawed in that most residents hadn't begun building so they weren't notified by mail, ie we had no letter box so to say they sent a letter to everyone is a lie!

regards

.

Subject: Moorebank Recycling proposal

Hi Emma

The article below is why no one wants this plant in our backyards.

<http://parramatta-advertiser.whereilive.com.au/news/story/in-a-dust-up-over-pollution/#.UT2c0kip5S0.mailto>

Also how does Moorebank recyclers have access to the site if council doesn't allow access to council property and my understanding is the RTA won't allow direct access from Newbridge Rd

Richard 9 Fairway Close Moorebank

More than you expect.
