Subject: Proposed Materials Recycling Facility-Opposed

Good afternoon Emma

I write to you this afternoon with much opposition to the proposed recycling plant.

I am in the midst of building my "dream home" in Georges Fair Moorebank in the surrounds that I believed to be optimum for bringing up a young family. Initially I was also quite excited to learn that an earlier proposal for the facility was rejected and replaced with the proposal for a Marine with additional parklands, bike tracks, etc.....

Now I have learnt that the proposal is back on the cards, I am quite concerned. If this facility was to get off the ground I would be leaving the area, that much I certain. I have grave concerns to the well being of my family and the community of other likeminded families, I am sure this project would be met with much opposition and I hope the NSW Government finds in the favour of the thousands of residents in Georges Fair and Moorebank.

Please do not let me dream home become a Hell Home! I have invested too much time and effort to provide my family with the best possible area to live in!

Regards,

Nick Cannella
