Address:
 Maddecks Ave

Moorebank, NSW
 2170

Content:

I oppose the building processing plan because

- too close to existing and proposed residential homes
- health risks from asbestos and toxins which is unacceptable for local residents
- potential of major flooding to the area as the material stockpiles may cause an environmental disaster throughout Moorebank and the entire Georges River Basin
- it is incompatible with the current and planned area for residential and recreational. The area is zoned E2 Environmental Conservation where it should not be used for a concrete processing plant. The development project is in close proximity to schools, parklands, the Georges River itself, cycleways, a proposed water marina, a library and a golf club.
- increase in traffic as stated by developer that the proposed facility will result in an extra 324 truck movements a day. This will have significant impacts on arterial roads including Nuwarra Road, New Bridge Road and Governor Macquarie Drive. The truck movements will be on peak hours, further impacting on already high congestion. Hence, the area should not experience any additional noise, pollution and congestion from this proposed facility.
- the proposed facility will have negative impact on land values. As we have spent significant amounts of money on land and homes. The proposed development will also have severe impact on land values and residents will not be compensated.

As a local community member, I OPPOSE the building waste processing plant. I call on councillors, the NSW Parliament, the Minister for Planning, the Planning Assessment Commission, the NSW Department of Planning and Infrastructure and the Premier of NSW to REJECT this proposal.
