 To whom it may concern,

We are a family of 4 people going to live in Georges Fair Moorebank. When we first drove to Georges Fair, we were very impressed with such a beautiful place with lots of new dwellings, nice roads and lovely parks. We want this house to be as a dream house in a peaceful environment, the best place for our parent's retirement.

After one year of hard-working to make all this happened, we came to know that Moorebank Recycling plant is proposed to be built near our place. This recycling plant will certainly destroy our dream. The plant would be located east of Georges Fair on land on the Georges River Bank, which has a capacity to receive and process 500,000 tonnes per year of waste products including asbestos, concrete, brick, asphalt, sandstone, sand and 324 heavy truck movements daily are extremely TERRIFIC.

Our first consideration is about the terrible and polluted atmosphere that could be created once this Plant is approved. The pollution can be either in the form of chemical substances that influence the water or flying dust generated from the recycling plant will dramatically affect the air which causing discomfort, disease, or death to humans, damage other living organisms such as plants and trees around the area. Noise pollution also needs to be taken into account. We spent more than 8 hours at works and travelling. Home is a great place to rest and release all stress. Considering the fact that the Recyclers run 6 days a week from 7 AM to 6:30 PM, this could be the biggest interfering problem to our relaxation.

Heavy traffic is another problem. The Brickmakers Drive was built for residents from Georges Fair onto Newbridge Road and Governor Macquarie Drive. There are still a lot of houses waiting for construction. This means there will be a lot more people living in this area. However, if the Proposal is approved, this route would be misused by 324 trucks every day to access recycling site and will certainly cause bad traffic. Parents are late to work, and children are late to school. Long traffic and smoke released from exhaust also enhance to the bad atmosphere.

Last but not least, the devaluation of every resident's property is also a problem that we would like to mention. How many houses are built in Georges' Fair? This could be more than a thousand. Millions of dollars could be spent in each house. House is not supposed to be depreciated like car. This is absolutely unfair to us when our money is gone for the Moorebank Recyclers' benefits.

We think the Local and State Government need to take action to stop the project. This is really a big problem that harms thousands of citizens in Georges Fair and surrounding areas. The recycling plant must be relocated to somewhere which is not close to residential zone.

Sincerely Yours
