I object to this stupid proposal that has no consideration of the new housing estate 250m away! This is a health hazard to the community.

Why is it that such proposals get built because some greedy businessman just wants more money without consideration to others around them?

And why is it that the planning department even considers such a proposal? Wouldn't it make more sense to have such a facility out west in areas like Kellyville, Camden, Middleton grange, oran park where all the new greenfield sites actually have construction waste to process?

Why ferry it all the way back inner city where there are built up estates with families children and business around already to breath in toxins and asbestos contaminated materials?

Surely there must be better proposals that will protect the local flora and fauna as well as add jobs to the local community? I see no value add to such a reciting facility to the local community? Hardly any new jobs will be created. All it does is pollute the area through dust, toxins, strewn waste all over roads and pills of crap the becomes a visual eyesore. Not to mention the increases truck traffic to local streets that kids play and ride their bikes next to! And what about the noise the trucks and machinery will generate?

You can hire anyone to give you a report that sounds nice but at the end of the day we "THE RESIDENTS" are the ones who will have to suffer if you let such a proposal go ahead!

I want our community to thrive and become beautiful. SOMething that adds value and brings people together not divide them. I'm sure if you lived here and this was proposed next door to you you would make the right decision in rejecting such stupidity. Please hear the community out and make the correct decision for our community. Thanks

Yours Faithfully,
 Ronald
