MP 05_0157 Moorebank Recyclers

I, OBJECT to this completely unacceptable proposal.

My daughter and her yopung family live in close proximity to the area and i find it astonishing that it would even be considered. This area, in recent times has been made available to residential development. It is ludicrous to think that people with young families would be put at risk by living so close to potential hazardous pollution. Who will give answers and pay medical costs if SILICA is present and adversely affects people living close by.

www.en.wikipedia.org/silicosis.

Why would such a facility not be more appropriately located to an industrial area, where the potential risk to our citizens is far lower?? I am shocked and saddened at the system that allows this type of risk to even see it come this far.
