Content:

Dear Planning and Infrastructure, I have lived in the Liverpool region my whole life; I am 24 recently married and have a child on the way. I am extremely concerned about this proposal of a recycling facility virtually in my future backyard, not only do I highly object to this proposal but i condemn it aswell.

I have spent my whole life living in the Liverpool district and it has been a decent place to live, until now. Yes i am young but i have a decent head on my shoulder to know that allowing the construction of a Waste facility to be built only a hundred metres or so from a highly dense residential area is insane.

If this Facility goes ahead it will be the last nail in the woodwork for the area of Liverpool, We are already facing the intermodal only kilometres away from the proposed location.

At time i drive past the already existing Facility and the fumes of Methane gas are already apparent.

This Waste Facility would not only dramatically increase the air pollution and turn the Liverpool area into looking like it was in Beijing or the desert, but it would be the final Killer for the Georges River. I highly doubt I'm the only one objecting to this proposal, if a Waste Facility is desperately needed then place it in an Industrial Zone such as Chipping Norton or Eastern Creek that already have the facilities there.

The area surrounding Georges Fair is only going to become increasingly more dense with residential.

To increase the size of the Waste Facility is diabolical and I, my Wife and my future Family Highly OBJECT to this proposal and condemn it.
