Subject: FW: Moorebank Recycling Plant

To whom it may concern,

I am writing to you to express my disappointment on proposed development of Recycling Plant in Moorebank area. After watching the episode on A Current Affair last night I realised how dangerous the proposal is. The episode on Current Affair really exposed what will happen to our lovely neighborhood if the project was to get approved- I am in more disbelief that NSW Government would even take such a toxic project into consideration. If you wish to view for yourself please follow the link <http://aca.ninemsn.com.au/article/8625573/housing-dream-shattered>

We are currently in the process of building at George's Fair and have been saving and dreaming about owning our own house for the past ten years. I think no one has the right to destroy our dream that we worked for so hard for for the past ten years.

It's absolutely unacceptable to even think about putting a Recycling Plant next to RESIDENTIAL area. All industrial projects should be developed outside of the city/outside of residential areas. Government talks a lot about clean environment however it contradicts itself when proposals like that are put forward. Additional taxes come into light every single day, just to name one carbon tax- yet, NSW Government still reviews proposals of building toxic recycling plants next to residential areas. I don't want my kids to have cancer and I am sure that will happen if they are to grow up meters away from a recycling plant. Alcohol and cigarette taxes go up all the time and people choose to purchase those, I don't wish to breathe in dirty air- just because someone wanted to make millions of dollars in profit.

Should the development go ahead it will result in dust, heavy traffic traveling through George's Fair and Brickmakers Drive. I am aware that the development was submitted to the council in 2005 and was rejected then, I am not sure why the council would reconsider an application now especially with all residential development that is taking place at George's Fair. Residents of George's Fair are looking for quality life away from noise, traffic and pollution. I don't want to imagine how much dust and pollution the Recycling Plant will produce. I do understand that certain measures will be taken to prevent pollution (and Yes, I viewed the proposal), etc however it is not enough when the plant is only 400m away from your home. George's Fair will turn into a rubbish dump that will not be suitable for families to live in and bring up kids.

What about property value? Of course value of four beautiful newly built homes will drop. I feel like we are getting ripped off and Government is not doing enough to protect residents and council managed area.

Words can not explain how disappointed we are by the proposal and trust that all concerns will be addressed and taken on board.

I look forward to your reply.

P.S. Please consider above letter as an OBJECTION to the proposal from myself and my fiancée.

Regards
 Yulia Shabanova and Vai Sanileva
