 to whom it may concern

I wish to express my strong opposition of the development of MP 05\_0157, Moorebank Waste Facility proposed for the Moorebank area.

As a new resident to Georges Fair, and a resident which is located within close proximity to the newly built Brickmakers drive, I strongly oppose the development of a new waste recyclers and the addition of 300+ heavy trucks accessing Brickmakers drive and making life for myself and my family unbearable.

I live in a culdesac which is less than 15m away from Brickmakers drive. The road is currently inundated with traffic, creating traffic noise from the early morning to the wee hours of the night. The traffic poses a significant risk to the safety of my young children. My 3 small children are unable to access their front yard due to the fear of not only being injured by a reckless driver but also being subject to toxic fumes threatening their health and wellbeing. We have trucks compression braking in the early morning and late at night.

With Brickmakers drive also having open access to adjoining streets of the Georges Fair estate there is also a significant risk for the safety and welfare of all children within the residential community. Currently there is no retaining walls blocking the site or sound of traffic utilising Brickmakers drive.

I really fear that the inclusion of further heavy vehicles utilising this road will have a detrimental impact on the health, safety and wellbeing of my family.

The development of a waste recycling facility and the impact it will have on the surrounding residential area will also greatly reduce property values in the area. Most residents in Georges Fair are hard working families with children. We have purchased here to provide our children with a better quality of life within a quiet community. If I wanted to live and raise my children near an industrial estate and within touching distance of a main road, I would have purchased a property near one and saved myself a few 100k. The fact that this site is even being considered so close to a newly developed residential area with young families is absurd.

Please don't take advantage of hard working young families just looking to cut a break. Please decline this proposal.
