Content:

This proposed recycling plant is less than 200 metres from a residential area as well as on the bank of a recreational river. The plant is to process material containing silica, asbestos and other dangerous material, as well as producing high levels of dust that will cause significant health problems for local residents.

In addition, the location does not have suitable access for the high volume of truck traffic that will accompany this operation.

It is absurd that this location is even being considered for an industrial waste processing plant. The hazardous dust and noise pollution that will be produced is a danger to local residents and the existing protected river.
